

## ABRIA™ DATA STORAGE AND FILE ACCESS

At AbriaCloud Technologies, we understand the importance of safeguarding your business data against loss, while making it easy to access your information from any device. We've designed our Remote Data Storage and File Access Solution with your security in mind, providing systematic backups, data sync solutions and encryption so you never have to worry about data safety. If you need to archive old records, increase storage capacity or meet regulatory requirements, AbriaCloud Technologies has you covered!

AbriaCloud Technologies customizes Remote Data Storage and File Access Solutions allowing you to:

- Grant document access where it's needed while limiting access to personnel records and other proprietary information
- Manually Backup and synchronize critical data from your desktop or device
- Automate backups and synchronization of data across devices
- Maintain data integrity and improve redundancy using our mirroring data replication process
- Enable access to important files from any Internet connection via our remote log-in platform
- Facilitate fast data recovery by combining storage, backups, and access with our Disaster Recovery and Business Continuity plans
- Collaborate with others simultaneously by accessing stored files or documents from our centralized system
- Assure Data Integrity by enabling simultaneous comparison of stored data to new data
- Maintain regulatory compliance

AbriaCloud Technologies' wide range of reliable Remote Data Storage and File Access Solutions gives your business the ability to store backup files and information securely, protecting your business and revenue stream.
